FAQ

- If the camera is not working or is not working properly, you can turn it off.

Put and hold the power button + Wi-Fi button.

Image not found or type unknown

The camera will turn off.

- Calibrate the camera compass if there are photo direction issues

Image not found or type unknown

To calibrate the camera compass:

1. With the camera turned on in front of you, make sweeping movements in the shape of an “8”.
2. This step will calibrate the camera, and the error icon will disappear.
